

*Free Flow Wines, the pioneer of premium wine on tap, delivers the world's premium wine brands to the taps of restaurants and large venues nationwide. Free Flow's keggling and logistics services have allowed the wine and hospitality industries to move away from bottles to a sustainable, environmentally-friendly delivery system that maintains wine integrity from the barrel to the tap.*

## WINE ON TAP

Wine on Tap is an innovative dispense method for wines by the glass to ensure a fresh and delicious glass of wine.. Wine-certified stainless steel parts and a special blend of inert gas (75% Nitrogen / 25% CO<sub>2</sub>) keep the wine from coming in contact with oxygen and enable a wine to stay fresh for weeks after being tapped.

## SERVICES

- Keg Leasing
- Keg Services
- Sales & Marketing Support
- Tap Installation Support

## SUSTAINABILITY

Wine on tap reduces the cost of traditional bottle packaging and transportation. By eliminating traditional packaging (bottles, corks, capsules, labels and cases), there is a great deal less to ship and recycle, lowering the carbon footprint of the wine, restaurant and hospitality industries. Each wine keg holds the equivalent of 26 bottles. Free Flow Wines' keggling and logistics services have brought more than 220 premium wine brands to the taps of more than 3,900 restaurants, hotels, sports, and entertainment venues nationwide. To date, the company has removed more than 7,113,912 wine bottles from U.S. landfills, equaling more than ten million pounds of trash.

## HISTORY

Free Flow Wines was founded in 2009 by two wine-industry veterans who wanted to innovate beyond the bottle and give wine lovers a better glass of wine, every time. They developed the Free Flow Wines process of keggling and serving wine on tap that is now used by the world's most respected wineries and their winemaking teams.

## FACILITY

Free Flow Wines built a state-of-the-art facility from the ground up. As the pioneer of wine on tap, all of their equipment is custom built for one purpose — placing fine wine safely into kegs. Free Flow Wines' cleaning processes have been vetted by the world's most sophisticated quality control teams and their standard operating procedures were developed entirely in-house. Free Flow Wines' state of the art cleaning ensures that every keg is cleaned and made wine-ready. Their cleaning, filling, and tracking systems ensure that fine wine gets from the barrel to the tap, tasting just the way the winemaker intended.
