

*Free Flow Wines, the pioneer of premium wine on tap, delivers the world's premium wine brands to the taps of restaurants and large venues nationwide. Free Flow's keg leasing, filling, logistics and canning services have allowed the wine and hospitality industries to move to a more sustainable way of offering consumers the freshest, best tasting glass of wine.*

## **WINE ON TAP**

Wine on Tap is an innovative dispense method for wines by the glass to ensure a fresh and delicious glass of wine. Wine-certified stainless-steel parts and a special blend of inert gas (75% Nitrogen / 25% CO<sub>2</sub>) keep the wine from coming in contact with oxygen and enable a wine to stay fresh for weeks after being tapped.

## **SERVICES**

- Keg Leasing, Filling and Logistics Services
- Canning Services
- Bulk Wine Storage
- Sales & Marketing Support
- Tap Installation Support

## **SUSTAINABILITY**

Wine on tap reduces the cost of traditional bottle packaging and transportation. By eliminating traditional packaging (bottles, corks, capsules, labels and cases), there is a great deal less to ship and recycle, lowering the carbon footprint of the wine, restaurant and hospitality industries. Each wine keg holds the equivalent of 26 bottles. Free Flow Wines' keggering and logistics services have brought more than 250 premium wine brands to the taps of more than 4,500 restaurants, hotels, sports, and entertainment venues nationwide. To date, the company has removed more than 12,462,892 wine bottles from U.S. landfills, equaling more than 18 million pounds of trash.

## **HISTORY**

Free Flow Wines was founded in 2009 by two wine-industry veterans who wanted to innovate beyond the bottle and give wine lovers a better glass of wine, every time. They developed the Free Flow Wines process of keggering and serving wine on tap that is now used by the world's most respected wineries and their winemaking teams.

## **FACILITY**

Free Flow Wines has locations in Napa, CA and Bayonne, NJ. Both locations are state-of-the-art facilities built from the ground up. As the pioneer of wine on tap, all of their equipment is custom built for one purpose — placing fine wine safely into kegs and cans. Free Flow Wines' cleaning processes have been vetted by the world's most sophisticated quality control teams and their standard operating procedures were developed entirely in-house. Free Flow Wines' state of the art cleaning ensures that every keg is cleaned and made wine-ready. Their cleaning, filling, and tracking systems ensure that fine wine gets to the customer, tasting just the way the winemaker intended.
